Antenna to Probe Moon
ST. LOUIS, MO. — New equipment designed to obtain better understanding of the moon is under construction, the American Association for the Advancement of Science was told.

Winfield W. Salisbury, director of research for the Collins Radio company of Cedar Rapids, Iowa, reported to the scientists' meeting that his company was constructing a reflecting antenna entirely different in form from the one used by the army signal corps when it established first radar contact with the moon several months ago.

He described the projected reflector as being parabolic in shape—40-foot circular cone—and he said it would allow "more concentration of energy on the objective than is possible with a square bed spring shaped reflector such as the army employed."

Fish Protein Source
For Muscle Building
Fish protein is of high quality for building and maintaining strong muscles and promoting growth, and contains all the essential vitamins and minerals in certain amounts of certain minerals and vitamins.

Fish is delicately flavored and cooking should bring out this flavor. The seasoning should enhance and not overpower this flavor. Fish cooks quickly, because connective tissue is small in amount. Overcooking, or cooking at too high a temperature, dries out the fish and toughens it. As a rule, fish are preferred for boiling and broiling and then for "broiling," steaming or baking. During the years of fat shortage, the housewives learned that broiled fish is an acceptable substitute for deep-fried fish and so broiling continues popular.

Locust Grove

Locust Grove, June 18.—Mr. and Mrs. P. A. Garrett and Mrs. Lila Poole spent Monday evening in Lynchburg.

Mr. and Mrs. Walter Robertson, of Washington, spent the weekend with their parents, Mr. and Mrs. Tom Robertson recently.

Mr. and Mrs. Jim Megginson and son, Roy, of Norfolk, Mr. and Mrs. James Beale and Mr. and Mrs. Clarence Beale and children, of Lynchburg, and Mr. and Mrs. Jimmie Beale were dinner guests of Mr. and Mrs. Willie Beale on Sunday of last week.

Friends of Mrs. S. T. Megginson in this community are sorry to hear that her father is ill.

Misses Yvonne and Polly Beale are spending this week with their grandmother, Mrs. Lila Beale.

Mr. and Mrs. Jimmy Martin, of Richmond, were dinner guests Sunday in the home of Mrs. J. K. Megginson. They spent the evening with her mother, Mrs. Alice Megginson in the home of Mr. and Mrs. R. L. Burke, Jr.

Freshen The Many ties may be frayed with a little sponging. The part most likely to be soiled is where the fold of the fabric comes under the chin. Prompt sponging with cleaning fluid and perhaps also with a cloth dampened in water may remove the soil. At this place also the tie is likely to become worn. If the tie is of sufficient length to allow for shortening, the remedy for wear is to take up the seam in the center a half inch or so which will bring the worn place under the collar and out of sight. If the tie cannot be cleaned or repaired for further wear as a rule, the fabric may be used in other ways—as a bright scarf for a child, a pocket handkerchief, or a scarf for a woman (by covering button holes), or edging at neck and sleeves of dark dress.
